

# Stormwater SUV

## Porous Pavement Maintenance

### ROUTINE VACUUMING

- Complete solution for routine maintenance of porous pavement and green infrastructure (such as bio-retention, rain gardens, and tree box filters)
- Powerful pure vacuum and blower — easy to use, stand-on operation
- Integrated hand wand and large volume, on-board debris collection
- Versatile tool for non-storm-water property maintenance — with available attachments
- General landscaping, litter/leaf collection, fall/spring cleanup

Hand-held wand attachment

Easy to transport

## Porous Pavement Maintenance

### FOCUSED DEEP CLEANING

- Most effective rehabilitation system available for all porous pavement
- Focuses extreme suction and water pressure of vector directly to porous surface
- Simultaneously blasts and extracts sediment from clogged pavement
- Available as a manually-driven system or mated with the SUV system (vector truck required)
- Restores maximum possible infiltration rate of any porous pavement system

High-pressure nozzles

SUV attachment
